## ACREAVES

**T**he Acreaves business model, public – private - community partnership, works by chained way. The poultry producer enters with the rural property and construction of the poultry farms, the government enters with the development of the productive chain, which includes the construction of small poultry farms, and Acreaves company supplies the chicks, the feed, technical assistance, vaccines, medicines when needed and the transport of poultry to be slaughtered.

The complex comprises **hatcheries** with capacity to hatch 640 hundred eggs per month; the **cold storage** chamber slaughters 25,000 poultry/day and has capacity to slaughter up to 50,000/day. With the expanding market, the goal is that the slaughter jumps to 50 hundred poultry/day.

The **Sausage Factory** has an annual output of 3,0 tons / year which generates the brand Sabbor products as mortadella, mortadella light, frankfurter, ham and sausage, among others.

The animal's food factory, with production capacity of 2000 ton/month, a total of 24 hundred tons/year is under expansion to 37,000 tonnes/year.
